EDUCATION

TUM School of Management, Technical University of Munich Chair of Financial Management and Capital Markets Postdoctoral researcher and doctoral student Thesis title: Three essays on corporate boards around the world	11/2011–Present
London School of Economics and Political Science Visiting scholar at the Department of Finance (with Dirk Jenter)	09/2017–10/2017 02/2017–05/2017
Stern School of Business, New York University Visiting scholar at the Department of Finance (with David Yermack)	01/2014–04/2014
Technical University of Munich/University of Augsburg M.Sc. with honors, Elite Graduate Program Finance & Information Management Stays abroad at Stanford University and Georgia State University	10/2006–08/2011

RESEARCH INTERESTS

Empirical corporate finance, corporate governance, boards, CEOs, capital structure

WORKING PAPERS

[The economic consequences of a “glass-ceiling”: Women on corporate boards and firm value](#) (job market paper, joint with Thomas Schmid)
presented at AFA 2016, FIRS 2016, SGF 2016, VHB 2016, Paris December Meeting 2015
VHB Annual Meeting 2016, Best Practice Paper Award

Abstract: We analyze capital market reactions to exogenous departures of female board members due to death and illness. Theoretically, the “glass-ceiling” effect implies that a more rigorous selection of female board members leads to superior qualifications of women on corporate boards. We find in short- and long-run event studies that the capital market responds more negatively to exogenous departures of women. This effect is more pronounced in countries where the selection of women is more stringent and fewer women serve on boards. Thus, the “glass-ceiling” effect leads to an over-performance of the (few) women who make it to the top.

[Index membership and capital structure: International evidence](#) (joint with Vidhan K. Goyal and Wenting Zhao)
presented at FIRS 2017, China International Conference in Finance 2017, FMA 2017, SGF 2017, FMA Europe 2017, Asian Finance Association Annual Meeting 2017
FMA 2017 and FMA Europe 2017, semi-finalist best paper award

Abstract: How much do shocks to the information environment in equity markets matter for debt supply and the financing of firms? We find that the use of debt increases by about two to three percentage points following exogenous additions of stocks to an index. The leverage response is primarily in public debt markets: Borrowing costs in these markets decrease, while bond liquidity increases. These results suggest that index additions affect leverage because an increase in public information reduces information asymmetries for lenders and increases their willingness to buy information-sensitive debt. Indeed, stocks added to an index are followed by more equity analysts. Overall, we support the view that information production in equity markets spills over into debt markets.

[Does board size matter?](#) (joint with Dirk Jenter and Thomas Schmid)

Abstract: This paper uses minimum board size requirements in Germany to assess whether large boards reduce firm performance. Since 1976, the legally required minimum size of the supervisory board increases from 12 to 16 directors as German firms pass 10,000 domestic employees. There is a sharp increase in board size at this threshold, indicating that the mandate is binding for many firms. Using a regression discontinuity design around the threshold and a difference-in-differences analysis around the law's introduction, we find robust evidence that forcing firms to have large boards lowers performance and value. At the threshold, operating return on assets drops by 2-3 percentage points and Tobin's Q by 0.20-0.25, with similar declines for treated firms after the law's introduction. Consistent with the main result, we also observe that firms above the threshold are more likely to engage in value-destroying acquisitions.

[The effects of culture on CEO power: International evidence from executive turnover](#)
presented at SGF 2016, FMA Europe 2016, VHB 2016

[The balance of power between creditors and the firm: Evidence from German Insolvency Law](#) (joint with Frédéric Closset)
presented at FMA Europe 2017, SGF 2018

Busy directors with distant board positions: Superstar directors or lost in translation? (joint with Marc S. Rapp and Thomas Schmid)
presented at FMA Europe 2017, DGF 2017, World Finance Conference 2017, IFABS 2015

WORK IN PROGRESS

The role of successors around exogenous executive retirements (joint with Dirk Jenter and Thomas Schmid)

Private equity managers and performance persistence (joint with Reiner Braun and Nils Dorau)
